

Information Management

Assignment 6

MAITREYI PILLAI

Q1. other script notations

JSON (JavaScript Object Notation):

- Structure: JSON is text-based format utilizing key-value pairs and arrays.
- Used in modern web databases (like MongoDB) because its structure maps directly to objects in most programming languages.

XML (Extensible Markup Language):

- XML uses a hierarchical tag-based system
 - Frequently used for data exchange between legacy systems.
-

Q2

1. `SELECT s.ID FROM student s LEFT OUTER JOIN advisor a ON s.ID = a.s_ID WHERE a.i_ID IS NULL;`
 2. `SELECT name, ID FROM instructor i WHERE NOT EXISTS ( (SELECT course_id FROM course WHERE dept_name = i.dept_name) EXCEPT (SELECT course_id FROM teaches WHERE teaches.ID = i.ID) ) ORDER BY name`
-
